

# IT EQUIPMENT RECYCLING

obsolete • excess • end-of-lease • end-of-life

[inovity.com/recycle](http://inovity.com/recycle)

## Simple, Ethical Electronics Recycling

Don't let your old gear end up in landfills.

Inovity offers simple options for

IT asset disposal and sensitive data destruction.

Reduce the costs, liabilities and burdens of recycling outdated technology with responsible equipment recycling—most at little or no cost to you.

## Recycle virtually any office-related technology—working or not!

Whether you've got a fleet of abused rugged handheld computers or a closet full of dusty desktops, we can take them all—including monitors, printers, network equipment, POS and more. If it's got a plug, we can take it off your hands (cables and accessories too).

## No data disposal strategy? No problem.

Inovity understands the critical nature of data erasure and ensures your protection by using the same eradication standard as the Dept. of Defense. The process will permanently erase systems, program files, viruses and all of your data, safeguarding proprietary information and preserving software agreements. We meet industry compliance for PCI, HIPAA, SARBOX and GLBA, and provide full certificates of indemnification.

## No landfills. Ever.

We help you maintain your sustainability efforts with zero tolerance on electronic waste entering our landfills. All recyclable devices are processed internally, segregated by commodity type (plastic, glass, steel, etc.) and sent to an approved, USA-based, R2-certified refiner for reuse.

### GREEN RECYCLING

Proper recycling can be frustrating, time-consuming and expensive. Inovity's goal is to simplify the entire end-of-lifecycle process for your electronic gear. With one vendor, you can handle all recycling, meet all federal, state and local regulations and know with 100% confidence that your recycling is certified, insured and honors our environment.

### AUDITING & REPORTING

Are you still paying for licenses on assets you no longer own? Is that smart phone still registered to an employee who no longer works for you? With Inovity's recycling services, receive full and complimentary auditing, along with detailed reporting so you can be sure you're not paying for devices you no longer use. Plus, you can track assets from "cradle to grave," passing all hardware and software audits you might face.

### DATA & BRAND SECURITY

Protecting your proprietary data AND your brand is equally important. What if your gear isn't disposed of properly? What if your asset tags are found on equipment unlawfully discarded? With Inovity's recycling services, you eliminate the high fees and uncertainty of traditional brokers and all of your liability is completely eliminated. Recycling services are certified to remove all identifying markers on retired assets and you will never pay extra for data removal.

## HOW IT WORKS:
