

MANAGING MOBILITY TRANSPORTATION AND LOGISTICS

MOBILITY IS EXPEDITING TRANSPORTATION AND LOGISTICS

Mobile technology has been indispensable in transportation and logistics for over 20 years. But, the industry is seeing an accelerating reliance on mobile devices and apps to improve customer service, reduce costs, and increase productivity. The downsides of more mobile devices and apps is more complexity, more risk, and more IT headaches. SOTI MobiControl eliminates risk and relieves those headaches. We make it easy to deploy, manage, secure and support all of your laptops, tablets, smartphones and IoT endpoints. SOTI helps you deliver better than the competition.

DELIVER END-TO-END SUPPLY CHAIN VISIBILITY

Lower costs and increased capabilities of mobile devices are putting them into the hands of everyone that touches the supply chain. They give real-time asset visibility to everything including drivers, vehicles, & cargo. Improved visibility from pickup to delivery is required for effective Supply Chain Management (SCM). Additional integration with important back end systems (e.g. CRM, ERP, payroll, etc.) lets you improve the efficiency, accuracy and timeliness of key business processes.

IMPROVE CUSTOMER SERVICE

More timely and accurate information makes everyone happier: the shipper, the carrier and especially the customer. Real-time data enables accurate delivery times and provides the reason and duration behind any delay. Keep your customers happy by rapidly identifying and reporting OS&D (Over, Short, Damage) situations and initiating freight claims process. Accurate delivery times streamline operational efficiency and make it faster and easier to offload and cross-dock important shipments.

WHAT CAN SOTI DO FOR TRANSPORTATION AND LOGISTICS?

ELIMINATE DOWNTIME

Mobile workers require a functional device for optimal efficiency. However, they don't have the expertise to fix them when a problem occurs. SOTI MobiControl's remote support features make it easy for IT staff to communicate with remote users, see what is going on and then fix the problem. Remote support is available anywhere and anytime so the problem device doesn't have to be shipped back to HQ for repair.

KEEP DRIVERS SAFE

Whether you manage a fleet of vehicles or oversee a mobile workforce, there are measures you can take to reduce risks of distracted driving. SOTI MobiControl's distracted driving policies can assist to protect your workers from dangerous driving. We let you lock down devices or applications based on vehicle speed. SOTI can help reduce risks to your organization by enabling lockdown/kiosk mode, which limits the functionality of mobile devices on the road.

TRACK YOUR ASSETS

Your workers are constantly on the move, and so are their mobile devices. Visibility into where these assets are, and what they are doing can improve your operations. SOTI MobiControl can track everything a mobile device does even down to when used. Our flexible reporting features make it easy for HQ to extract this information to figure out ways to streamline their mobile operations. SOTI helps you keep track of your valuable mobile assets with robust reporting and analytics capabilities to drive efficient mobility management.

MAINTAIN COMPLIANCE

Mobile technology, embedded engine telemetry and Electronic Logging Devices (ELDs) are capturing more data and such as mileage, fuel consumption, engine performance, and driver hours of service (HOS). Temperature sensors in warehouses, refrigerated trucks and trailers, maintain "cold chain" compliance. SOTI MobiControl secures and manages all of your mobile devices and intelligent IoT endpoints. Whatever device make, form factor, and operating system you need, SOTI can support it and will continue to do so as long as you require.
